

The Many Benefits of ASTAXANTHIN for Health Conscious Consumers

Astaxanthin is a naturally occurring dark red carotenoid pigment found in aquatic animals such as salmon, trout, krill, shrimp, crayfish and crustaceans. Algal astaxanthin provides a broad range of health benefits, which are well-established through extensive research and clinical studies.

Consumers can obtain this valuable nutrient from seafood or a dietary supplement. The ubiquitous fresh water microalga, *Haematococcus pluvialis*, is the richest natural source of astaxanthin and is used in the production of Solasta® Astaxanthin.

POTENT ANTIOXIDANT

and much more potent than other carotenoids such as lutein, lycopene and beta carotene.
