

# 9-Point Solasta® Astaxanthin Supply Chain Advantage

## SPEED AND FLEXIBILITY

Solix maintains USA-based product inventories for rapid customer delivery. And, our in-house, USA blending operation provides the option to formulate with high quality, natural astaxanthin in a variety of carrier oils.

## TRIPLE-FACTOR QUALITY MANAGEMENT SYSTEM

Solix Algreredients delivers quality products based on robust testing, rigorous manufacturing discipline and third party certification.

## BIOMASS QUALITY

Our biomass growers produce high-quality natural algal biomass in closed photobioreactor systems that meets the Solix quality management system standards.

## USP GRADE

Solasta® conforms to the stringent USP astaxanthin standard, including pheophorbide.

## NATURAL SUN POWER

Direct sunlight is the energy source powering the growth of this high-quality natural algal biomass.

## CUSTOMER VALUE

We add value in transforming the biomass into Solasta® Astaxanthin in the USA, and in turn provide customers with a reliable, high-quality supply of natural astaxanthin.

## FLEXIBILITY EQUALS VALUE

We purchase biomass because it enables us to provide the most economical, added-value finished ingredients to customers.

## USA EXTRACTION

We work with a US-based extractor that for decades has applied supercritical fluids to the extraction of a wide range of natural ingredients, including astaxanthin.

## DIRECT AUDITS

We have visited and audited each of these growers and they have been qualified as critical suppliers in our internal quality management system.
